Cognitive Learning Techniques

We all have favourite and not-so-favourite subjects, don't we?

That's because human brain has some unique capacities and weird limitations when it comes to memory and the content of learning. Humans are unique in comparison to animals because we have the capacity to do *abstract symbolic reasoning*. Relationship between thoughts, feelings and behaviour has an impact not only on the way we see the world but everything we do.

Cognitive Learning Techniques attempts to understand *cognition* (the process of knowing) and derive techniques that could enhance this process. Adopting a teaching style according to the techniques will help students to learn better, thus increasing the teaching effectiveness.

Key Concepts

- Mental Representation
- Stages of processing
- Serial vs Parallel Processing
- Hierarchical systems
- Cognitive architecture
- Memory stores
- Consciousness

Methodology

- One full day workshop
 - Action Learning
 - Team work
 - Case Studies
- Observation
- Assessment
- Certification
- Continual Post Workshop Support

A free 90 min
demo session

Key Takeaways
